

# Why attend **GBS 2024?**

**Green.  
Building.  
Solutions.**

The construction industry is constantly changing, so it's more important than ever to stay up to date with the latest developments. That's why we would like to invite you and your employees to join our award-winning and internationally renowned training about sustainable architecture in Vienna.

The Green.Building.Solutions. Summer University (GBS) is a three-week academic summer program in Vienna, which is not only aimed at students, but also at professionals and practitioners from the fields of architecture, planning and engineering. We think that the diverse group of participants has enormous benefits in the sense of knowledge exchange, intercultural experiences and knowhow transfer, for those who join.

Since 2011, OeAD student housing has been organising Green.Building.Solutions. (GBS) in a close partnership with BOKU University and TU Wien. The next programme will take place from July 13 to August 4, 2024. Together with local experts, relevant topics in green building will be discussed and implemented in a final design work.

Up to 60 participants from all over the world join this interdisciplinary programme of lectures, workshops and excursions to pioneering examples in Vienna each year. Panel discussions, movie nights and evening events, including networking opportunities and cultural activities, are also part of the schedule.

We would like to invite you to consider GBS as a training opportunity for you or your employees.

The participation fee is €3,290, which includes accommodation in the first international student guest house built to passive house standards (Molkereistraße). All programme points are included (excl. travel costs, insurance and personal meals). Participants can also stay in the student house for another week after the programme, free of charge.

Take advantage of a rich and diverse academic programme with experts from the construction industry and join our cohort together with students of mixed backgrounds and study fields.

We believe that this is a unique opportunity to support lifelong education and would be delighted to welcome you or one of your team this summer.

Alongside taking part, businesses can also consider a scholarship sponsorship - supporting students from all backgrounds to access GBS by financing a scholarship (€2,500).
